

Lab 2

In today's lab, you are asked to complete the following task to apply the coding skills and knowledge you've learned.

- 1) For each task take a screenshot and name the file as "yourname_cs110_lab2_task1" and "yourname_cs110_lab2_task2" and submit it to Canvas.
- 2) Save the editor as yourname_lab2_cs110.py and submit it to Canvas.

Task 1: String Manipulation

- Print "Today is Wednesday." in as many different ways as you can (up to 3).
- **Hint:** Pay attention to spaces between words when using concatenation or other methods.

Task 2: Username Generator

- 3) Print a greeting for your program.
- 4) Ask the user for the city they grew up in and store it in a variable.
- 5) Ask the user for their favorite number and store it in a variable.
- 6) Print a message that combines the user's city and number inputs and tells them their new username. Include a space between your city and number.

Tip: Make sure the input cursor shows on a new line.
